## **Abstract**

This present article has the aim to explain and to actualize the recent modern exegesis of one of the most known parable from the New Testament, about the poor Lazarus and the unmerciful rich. The first point will be to give a response for the question if it is just a parable or a paradigmatic history. Regarding the modern erminia we will have four sections to analyze it, namely: the image of the rich man, the description of life after death, the image of Lazarus and the role of the Patriarch Abraham.
