### **Abstract**

This paper about our three Holy Capadocian Fathers represents our personal reflections expressed with the occasion of the celebration of our protectors of our Theological Faculty of the University of Craiova. Today we are in a spiritual crisis and we should look how these Fathers of the Church reacted to their problems in their time. We will have three important parts where we will mention the essence of their theology. First part will be about Saint Basil the Great, one of the most important bishops involved within the social life. The second part, about Saint Gregory of Nazianzus, expresses his theological high level. The terminology about the Holy Trinity was established due to his theological reflection. In the last part of our presentation, we speak about Saint John Chrysostom, one of the best preachers of the Christian Church.
