Abstract

The divine origin of the Church has its roots in its very source and foundation, the eternal Council of the Most Holy Trinity, which created the world from nothing in the beginning. The Church becomes – through the uncreated energies revealed and shared hypostatically by God the Father through Christ in continuous Pentecost of the Holy Spirit – the perfection and crowning of God's creative work in time and over time, as He transcends the beginning and end of the time of creation. He remains in the Church forever, more precisely raises the Church to a new eternal being at the right hand of God the Father, of the Kingdom of God which will come.
